PROJECTS

Students learning Website (Study Sync)

- I developed this website whole frontend designed to understand and respond to students.
- Additional core functionality like including lecture downloading, book order system.
- Created visualization and dashboard to present good interface for learning.
- Implemented a user-friendly interface, ensuring seamless interactions between students and teachers.
- This project it's type of learning platform it helps students to learn like on videos, articles, notes.

Personal Portfolio Website (Portfolio)

- This portfolio website contains my all professional information, this introduce myself to others.
- Created a animated skill-bar, educational information container, resume downloader.
- Using html5, css3, javascript, bootstrap, I made it.
- Website are less to the user-friendly interfaces and user enjoying to scroll down and view all information.
